PERSONAL PROFILE

A results-driven IT professional, who is currently working in an English company in London acquired transferable technical skills with organisations in Spain and the UK using a wide range of software products. A multilingual individual with extensive commercial acumen allied to client-facing and team positions in the workplace. Adept at interfacing between technical and non-technical personnel, effectively supporting business-critical functions.

Seeks a **Hybris Developer** to utilize technical experience to provide a valuable contribution and deliver quality services.

SELECTED SKILLS and ACHIEVEMENTS

- Excellent interpersonal skills were used to gather project requirements; tested and installed solutions; built a rapport in professional relationships; disseminated information and created technical documentation.
- Complemented the Bachelor Degree with a specialisation in Computer Science with IT skills training courses and the Java 6 Oracle's JSCP, J2EE certificate and Hybris 5 Certificate..
- Experienced with a variety of software tools. Worked in MS Windows environments, with Oracle, SQL Server and MySQL databases; developed applications using Spring MVC, Java and other programming languages.
- Adapted rapidly to new business areas and cultural diversity, strong technical abilities with IT systems and products. Multi-tasked within pressurised environments to meet tight time frames.
- Clearly showed an emphasis on attention to detail and understood the core requirements of clients and users.
